PART 2 · PROJECT SELECTION

Why FTaxAI?

Five selection criteria

An AI tax & accounting assistant for household businesses, individual owners and online sellers.

SUCCESS DEPENDS ON

- Accuracy
- Trust
- Conversion

1 Market demand

6.1M

household businesses in Vietnam (end of 2025)

≈10M workers · VND 32.8T+ paid to the state budget

Share that struggles with...

Customer data for e-invoices	71.2%
Updating tax policies	66.8%
Declaring & paying tax	62.3%

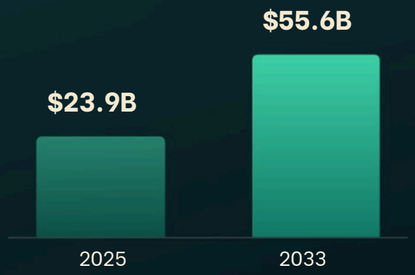

Source: VCCI · survey of 1,001 household businesses, Feb–Apr 2026

01

2 Growth potential

Global tax management software (USD bn)

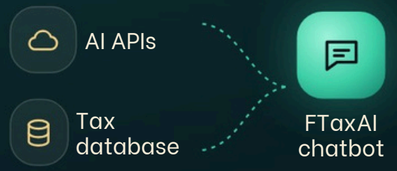

×2.3 · CAGR 11.3%

Source: Grand View Research

02

3 Tech feasibility

✓ No model trained from scratch

03

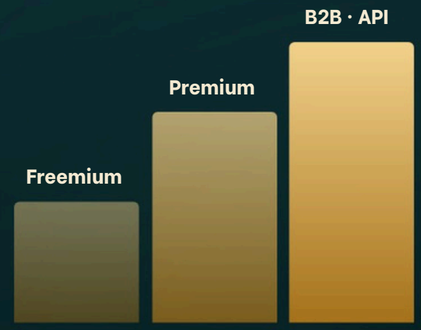

4 Competitive edge

"3 steps for your shop – here's how."

- Plain-language answers
- Step-by-step guidance
- Legal references
- Excel & basic bookkeeping

04

5 Scalable model

81% saw lower revenue in 2025 → a free tier lowers the barrier

05

Value Proposition Canvas

VALUE MAP · FTAXAI

Products & services

- AI chatbot website
- Tax knowledge base
- Step-by-step guides
- Document upload & summary
- Excel bookkeeping
- History & deadline reminders
- Freemium · Premium · B2B later

Gain creators

- Tailored answers, anytime
- Deadline reminders
- Simple interface
- Flexible plans

Pain relievers

- Plain language
- Legal references
- Updated database
- Free version
- Data security

FIT

CUSTOMER PROFILE · HOUSEHOLD BUSINESSES

Gains

- Clear steps
- Time saved
- Accurate, current info
- Reasonable cost

Customer jobs

- Follow tax rules
- Register, declare & pay
- Track revenue & profit
- Keep books & invoices
- Look up answers

Pains

- Complex legal terms
- Policy changes
- Fear of wrong filings
- Distrust of AI

FTaxAI is a specialized AI assistant that helps household businesses understand tax rules, complete procedures and manage their books — through easy answers, step-by-step guidance and smart tools.

SO EVERY OWNER KNOWS

What
to do – the obligations that apply

How
to do it – step by step, with documents

By when
it is due – with reminders

Three levels of product

More than a chatbot

Core benefit

Understand and resolve tax issues yourself

- Simpler tax rules
- Practical procedures
- Time saved
- Basic books
- Confidence

Actual product

The features customers use directly

- Website, no install
- Natural-language chatbot
- Tax KB + legal refs
- Document summary
- Excel bookkeeping
- Simple UI

Augmented product

Extra services that raise satisfaction

- Conversation history
- Deadline reminders
- Regulation updates
- Freemium · Premium
- Support
- B2B API (long term)

WE SERVE IT WITH Pro package B2B API

Market trends

GLOBAL

of tax pros name AI their top tech priority
2024 → 2026 · Thomson Reuters

→ Room for a specialized tax chatbot

94%

want authoritative sources · 90% explainable AI · 96% data protection

→ Cite legal sources, protect data

86%

of organizations outsource ≥ 1 tax process
Deloitte 2025

→ Supports the B2B API model

VIETNAM

99.4%

e-declaration · ≈7B e-invoices in 7 months of 2026
Ministry of Finance

→ Already used to digital tax tools

18 ↛ 26%

of businesses use AI · 72% see higher productivity
Strand Partners 2026

→ Growing acceptance of AI

49.8%

of household businesses understand new tax rules
VCCI 2026

→ Freemium + step-by-step fit

Tax sector launched its own policy chatbot

→ Differentiate: household focus + bookkeeping

Competitor map

Rivals are heavy software, human agencies, general AI or government tools. **No one offers plain-language household guidance + bookkeeping at a low price.**

- Direct
- Indirect
- Potential
- FTaxAI

Positions are our qualitative reading of the competitor analysis. Hover a bubble for details.

PART 5 · SWOT

SWOT analysis

A focused product with real limits – and a clear plan for each.

S Strengths

- Plain-language AI tax chatbot built for household businesses
- Two revenue lines: Pro package + tax APIs for accounting, POS & business software

W Weaknesses

- Narrow scope: basic household compliance
- Serviceable market not yet validated
- Depends on legal accuracy & execution

O Opportunities

- Tax-tech USD 23.9B → 55.6B by 2033, Asia-Pacific fastest
- ≈6.1M underserved household businesses
- API partnerships with accounting & POS platforms

T Threats

- Big gap between headline numbers and paying users; low tech literacy
- 80%+ report revenue decline → hurts subscriptions
- Frequent tax rule changes raise upkeep

Survey methodology

Mixed method · strong interest, trust & cost are the barriers

PART 6 · IN-DEPTH INTERVIEWS

Six voices, five pains

SMALL HOUSEHOLD BUSINESS OWNERS

Nguyen Thi Lan · 41
Grocery store

Nguyễn Trọng Hiếu · b. 2000
Small restaurant

ONLINE SELLERS

Truong Anh · b. 1995
Shopee · TikTok Shop · Facebook

Ly Anh Ba · 25
Online retail, same platforms

NEW REGISTRANTS

Pham Thi Thao Linh · 24
Planned online fashion store

Vu Phuong Anh · 25
Planned small F&B shop

Hard-to-read rules
long, technical documents

Unclear steps & deadlines
fear of missed dates

Scattered info
Google, groups, friends disagree

Manual data
notebooks, phones, Excel

No case-by-case help
want answers for their situation

→ **Implication:** an AI chatbot for tax Q&A and Circular 152 that reads Excel & sales data and consolidates revenue and expenses.

Two customer segments

B2C

Owners & sellers aged 25–50

BEHAVIOUR	Record revenue & expenses; work out tax due monthly
MINDSET	Fear of mistakes; don't want to depend on accountants
PAIN	No accounting know-how; long legal documents
WHY FTAXAI	Easy chatbot · Q&A under Circular 152/2025 · Excel → accounting records

B2C first

→

validate demand, then add B2B packages & API

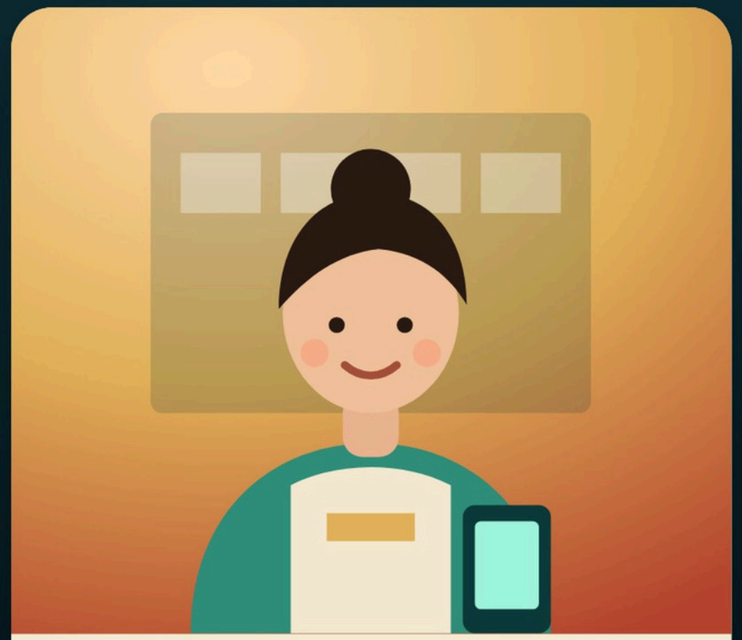

B2B

Tax agents, accounting firms, cooperatives, market boards, HB support orgs

BEHAVIOUR	Help traders in their network comply, at lower cost
MINDSET	Automate support, raise grassroots productivity
PAIN	Repetitive manual guidance; staff time on documents & e-invoices
WHY FTAXAI	Embed the chatbot in their network · automated Q&A · less staff pressure

PART 7 · PERSONA

Meet Ms. Lan

PERSONA · B2C

Ms. Nguyễn Thị Lan

41 · runs a grocery store at home · does selling, buying, revenue and books herself · basic digital skills

Wants to know what to do, how, with which documents, where and by when – in plain language.

Channels

91.3%

look for tax help on Facebook · also Google, friends

Behaviour

88.5%

use Excel/Sheets · 75% paper · forgets small expenses

Influences

92.3%

want easy explanations · 81.7% reliable sources

Budget

<50k VND

37.5% accept under VND 50k/month · prefers free

Concerns

92.3%

fear inaccurate AI · 81.7% data exposure · high cost

How FTaxAI helps

- Rules, steps, legal basis & deadlines
- Less searching & data entry
- Confidence to do it herself

Customer Journey Map

Customers arrive with a specific tax problem – and stay only if FTaxAI proves **accurate, clear and current**.

6 stages

Trust = make-or-break

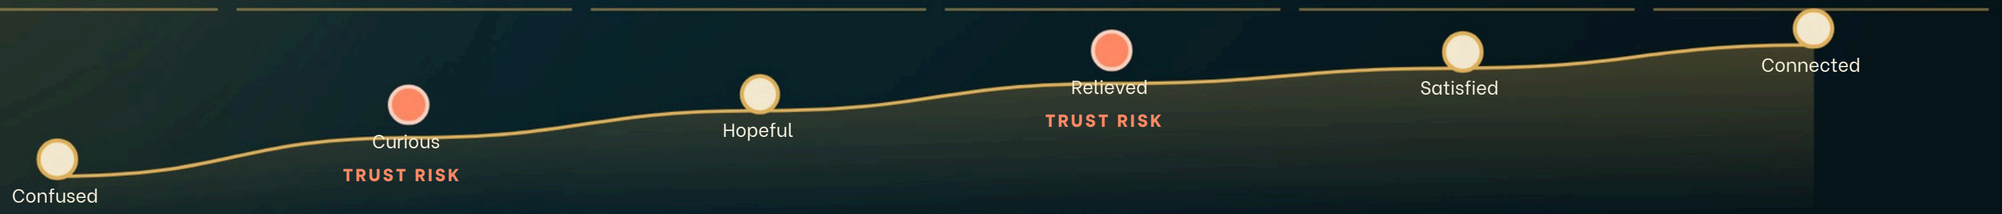

CUSTOMER JOURNEY MAP

Click to zoom

Stage	Awareness (0–4 weeks before help)	Consideration (1–2 weeks before help)	Purchase / Use (Day 1 – 1 week)	Experience (Ongoing use)	Sharing (After positive experience)	Re-engagement (When needed)
TOUCHPOINT	• Facebook • Google • TikTok • Household business groups • Acquaintances	• Website • Facebook Page • Demo videos • Reviews	• Website • Registration • Trial	• Chatbot • Document upload • Excel • Lookup / search	• Facebook • Business groups • Acquaintances	• Notifications • Question history • Email / Facebook
ACTION	• Encounter a tax problem • Search for information • Discover FTaxAI	• Explore features • Compare with Google, ChatGPT, ask acquaintances	• Register an account • Ask questions • Try features	• Ask tax questions • Receive guidance • Upload files • Apply in practice	• Evaluate the service • Share experience • Recommend to others	• Receive alerts • Check new regulations • Return when needed
EXPERIENCE	• Confused by inconsistent and hard-to-understand information	• Interested but doubtful	• Hopeful about asking directly	• Convenient if the answers are accurate and understandable	• Satisfied if problems are solved	• Trust and habit
PAIN POINTS	• Inconsistent information • Complex tax regulations	• Accuracy of information • Trust in AI • Data leakage	• Unclear how to ask • Uncertain whether AI understands their situation	• Inaccurate or outdated answers • Complex tax issues • Too much data to handle	• Little motivation to share if the experience is weak	• Forget FTaxAI • Regulations change
OPPORTUNITIES	• Plain-language tax content • SEO • Real-life examples	• Show legal sources and update dates • Demos • Free trial	• Simple onboarding • Question examples • Freemium model	• Situation-specific answers • Legal references • Updates • Excel/document support	• Reviews • Referrals • User community • Real-life cases	• Deadline reminders • Policy-change alerts • Saved history • Regular knowledge updates
EMOTION JOURNEY	Confused →	Curious →	Hopeful →	Relieved →	Satisfied →	Connected

Ms. Lan's journey, from awareness to re-engagement

Journey, stage by stage

	1 Awareness	2 Consideration	3 First use	4 Experience	5 Sharing	6 Re-engage
CUSTOMER DOES	Finds us on Facebook, TikTok, Google, word of mouth	Visits site, demos; compares with ChatGPT & accountants	Signs up, asks a first question	Obligations, procedures, documents, revenue data	Recommends in groups & networks	Returns at filing time or when rules change
PAIN POINT	Inconsistent sources, hard legal texts	92.3% fear inaccurate AI · 81.7% data leaks	Unsure what to ask or provide	A wrong or outdated answer kills trust	No trust → no referral	Used only when a problem appears
FTAXAI	Real-situation content in simple language	Show sources, update dates, privacy; free trial	Suggested categories; fast first answer	What · how · docs · where · deadline · legal basis	Reviews, case studies, referral programme	Reminders & policy alerts → first tool they think of

B2C → B2B

Start with B2C to validate demand, then expand to B2B once the platform is stable.

FTaxAI Business Model Canvas · from our report

Nine blocks in detail

Key Partners

- AI model, cloud, storage & document providers
- Accountants, tax experts, consulting firms
- Tax agents, accounting providers, cooperatives, market boards

Key Activities

- Website & AI API integration
- Build, verify, update tax KB
- Answer quality control
- Marketing & data security

Key Resources

- Website, chatbot, AI API, database
- Verified tax & accounting KB
- 6-member team + advisors
- Funding

Value Proposition

- Complex rules → plain guidance: what, how, documents, where, by when
- With legal basis
- Document summary, Excel import, basic bookkeeping
- B2B: answers repetitive questions, cuts consulting load

Customer Relationships

- Automated AI support
- History & deadline alerts
- Regulation updates, feedback
- B2B onboarding & support

Channels

- Facebook, TikTok, SEO website
- Household & seller communities
- Website sales, referrals, partners

Customer Segments

- **B2C first:** household owners, small traders, online sellers, starters
- **B2B:** tax agents, consulting & accounting firms, market boards, cooperatives, support orgs

Cost Structure

Development (web, AI, UI) · AI API, servers, storage · Knowledge base & legal updates · Expert consulting · Data security · Marketing

Controlled by a focused MVP and existing services

Revenue Streams

Premium · monthly / annual · B2B packages: multi-user, support, integration · Custom services

Survey: 37.5% would pay under VND 50k/month → free plan + low-priced Premium

Break-even

≈78 packs per month

Investor factors

INITIAL WORKING CAPITAL

40M VND

1 · Target investors

- Angel investors
- VC funds
- Tech companies
- Finance, accounting & tax orgs

Early on: angels who bring expertise & partner links

2 · Capital needed

18.9M burn	21.1M reserve

Cash low of 21.1M in month 8, positive from month 9

Covers the build and long-term upkeep

3 · Use of funds

- Technology & optimization
- Tax & accounting database
- Marketing & product trials
- Servers, API, staff
- B2B partnerships

4 · Fundraising

STAGE 1
Team + angels → MVP

→

STAGE 2
VC once usage proves demand

Also incubators, competitions, strategic partners

5 · Value for investors

- Entry to AI tax-tech for VN households
- Freemium / Premium revenue
- Future B2B & API revenue
- Profit or share-value returns

6 · Risks & control

Five key risks, each with a control measure

→ Next slide

Risks & controls

RISK	CONTROL
Tax policy changes often → data goes stale	Process to review & update specialized data
Inaccurate answers hurt trust	Cite legal sources · quality control · test with real users before scaling
Users reluctant to pay for AI tax help	Freemium trial · track Free → Premium conversion
Competition: accounting software, tax platforms, general AI	Stay specialized for households · track satisfaction & retention
User data security	Security & privacy controls throughout

Four things to remember

1 · PROBLEM

63.5%

struggle to understand tax rules · 6.1M household businesses affected

2 · DEMAND

75.9%

interested · 73% likely to use FTaxAI

3 · MODEL

≈78 packs

break-even per month · Freemium, Premium & B2B API

4 · NEXT STEP

MVP

prove product-market fit with live users · angels fund the MVP

Thank you
